WELLNESS COUNCIL OF NORTHEAST OHIO MISSION

Promoting healthy decisions for employers and their employees since 1987 when established as a Medical Laboratory

Developed quality standards in use today across the industry

Offering an integrated suite of health & wellness services

Serving clients - employers, health systems, & government

IMPACT HEALTH BACKGROUND

- ▶ Temperature Screening
- ▶ COVID-19 Testing
- ▶ Flu Vaccination
- ▶ Biometric & Cognitive Screening
- ▶ COVID-19 Vaccination (when available)

IMPACT HEALTH SERVICES

IMPACT HEALTH EXISTING CLIENTS

- ▶ **Yale New Haven Health System**
- ▶ **CBS**
- ▶ **Mainline Health**
- ▶ **Children's Hospital of Philadelphia**
- ▶ **Toll Brothers**
- ▶ **Benefits Exchange Alliance**

- ▶ An early predictor of the COVID-19 virus which can help reduce the rate of transmission and provide a level of protection for the population. A well-run temperature screening service conveys a commitment to the health and well-being of employees.
- ▶ An important component in getting employees back to work and keeping them safe and healthy. This may increase productivity and help to control health care costs.

TEMPERATURE SCREENING

COVID-19 TESTING

- ▶ Can assist employers bringing employees back to work. They can identify workers that currently have or have had the COVID-19 infection. Once back at work, ongoing COVID-19 Testing helps spot early incidences of infection before the virus spreads.
- ▶ Two Types of Tests:
 - ▶ Serology Test. Identifies presence of COVID-19 antibodies. Results available in 15 minutes (finger stick).
 - ▶ PCR Test. Identifies current infection from virus. Results processed in a Regional Lab with 24-48 hr turnaround (nasal or throat swab).
- ▶ Delivered by certified, trained professional nursing staff. Program management methodology ensures an efficient delivery and positive customer experience. All data is secured and ePHI stored in a HITRUST® environment.
- ▶ An important component in getting employees back to work and keeping them safe and healthy. This helps employers increase worker productivity and manage health care costs.

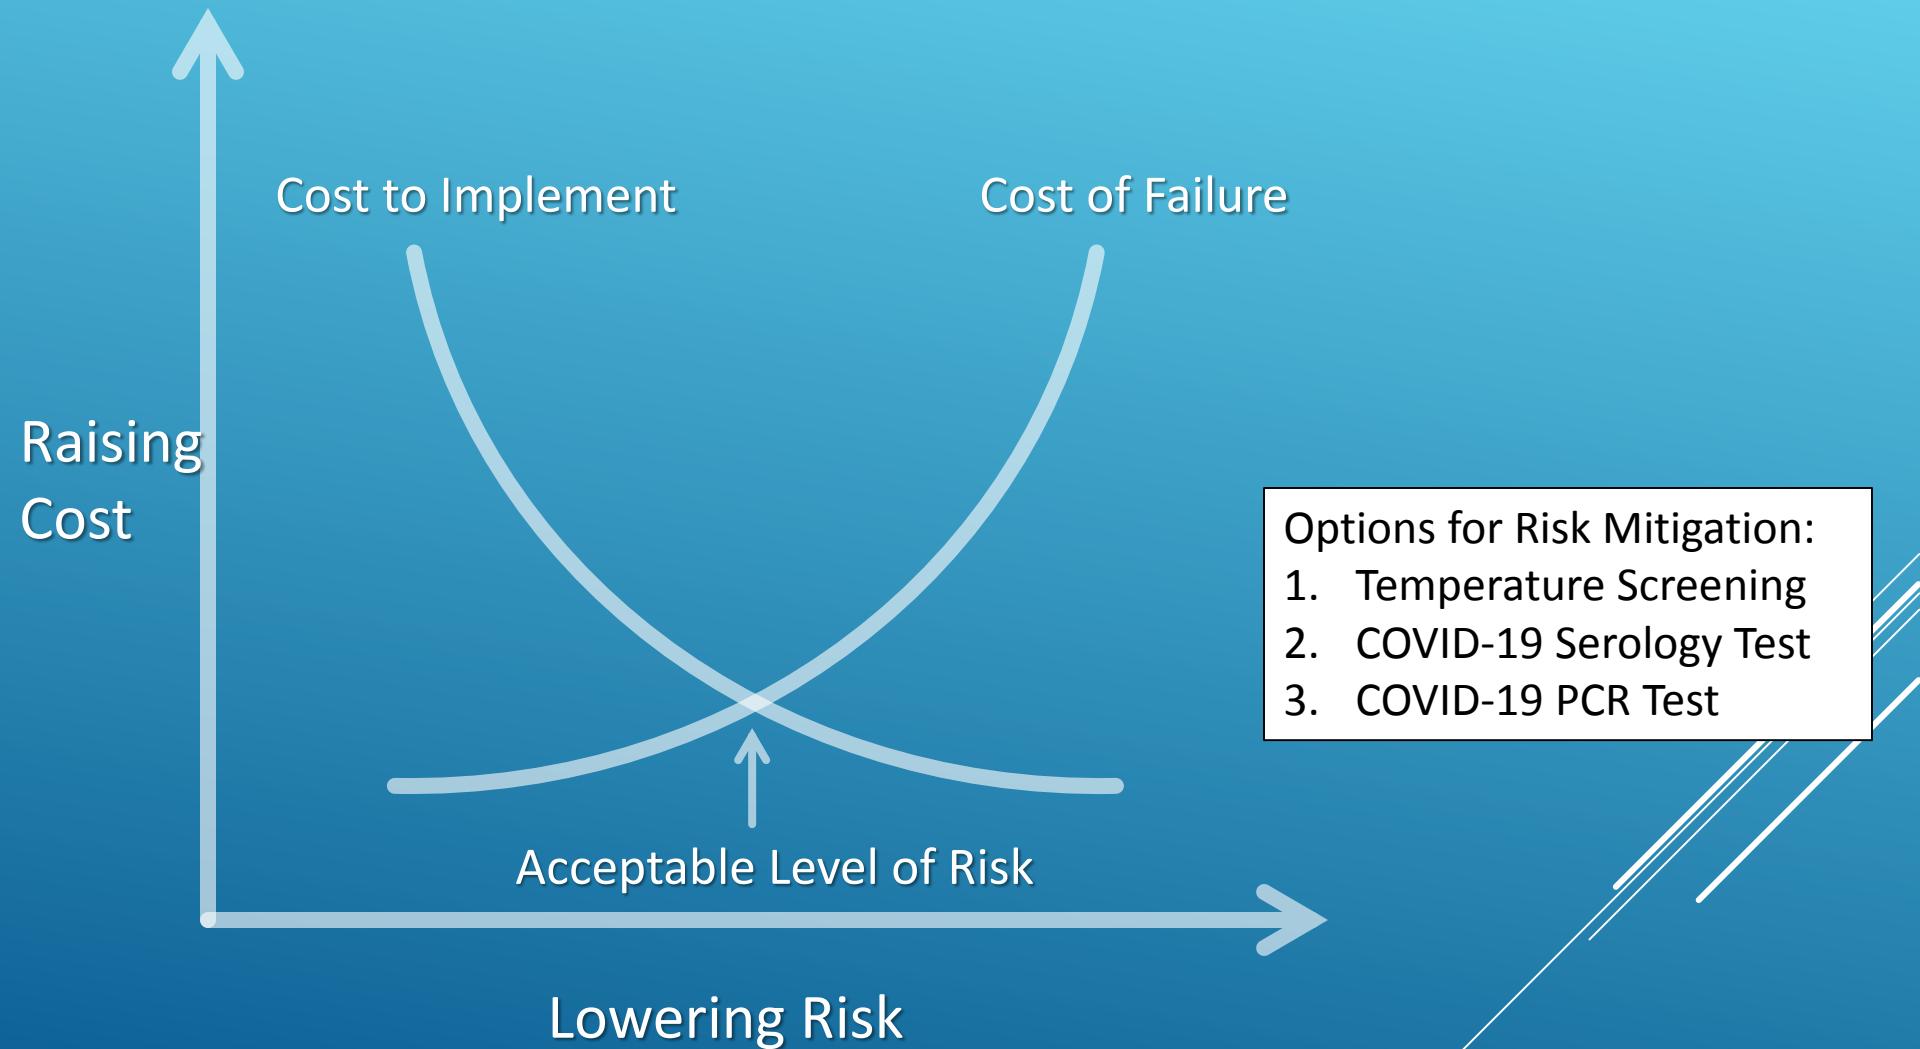

- ▶ Employers are seeking to be proactive with respect to this year's flu season. Getting workers vaccinated for the flu not only keeps them healthy and better prepares them should they contract the COVID-19 virus, but may also achieve a level of herd immunity which provides a measure of protection for all employees.
- ▶ Delivered by certified, trained nurse staff. Program management methodology ensures an efficient delivery and positive customer experience. All data is secured and ePHI stored in a HITRUST® environment.
- ▶ An important component in keeping employees safe once they are back at work. It may increase productivity and help manage health care costs.

FLU VACCINATION

- ▶ Once employees are back to work and safe, employers can baseline their workers physical and cognitive health. Once accomplished, the employee will have specific results that can be a catalyst for positive behavior change if needed.
- ▶ Two types of Screening:
 - ▶ **Biometric Screening** services provide a full range of screenings can be completed using a finger stick test for immediate results. Screens include Lipid profile, Glucose, HbA1c, blood pressure, body composition, waist circumference and BMI. “Motivational Moments” provide a one-on-one opportunity to share healthcare information with each worker based upon their results.
 - ▶ **Cognitive Screening** services drive awareness of brain health and the cognitive impairment that can lead to productivity diminishing impact in the workplace such as stress, injuries, inappropriate behavior, memory lapses, decision making and the operation of machinery. The service is self-administered, takes five minutes to complete and is built upon the powerful Cognivue Technology platform. Results are private for the employee and they receive a report, provider letter and follow-up details. Cognitive screening can identify brain health issues early on when intervention is possible.
- ▶ Both services are delivered by certified, trained professional nurse & technician staff. Program management methodology with online scheduling ensures an efficient delivery and positive customer experience. As a medical laboratory, high standards are adhered to for quality. All data is secured and ePHI stored in a HITRUST® environment.
- ▶ Biometric & Cognitive screening are an important component in establishing a program with goal of empowering employees to take ownership of their own health and wellness. It may increase productivity and help manage health care costs.

BIOMETRIC & COGNITIVE SCREENING

MITIGATING RISK & DECIDING WHERE TO INVEST

- ▶ Professional program management
- ▶ CLIA-waived Medical Laboratory with the highest quality standards
- ▶ Secure data management
- ▶ Highly rated, interactive client experience
- ▶ Focused on achieving outcomes – productive employees at work with a high quality of life/work with lower healthcare costs
- ▶ HIPAA compliant
- ▶ Regulatory Compliance
- ▶ HITRUST® storage of ePHI – higher standard of security, above SOCII compliance

WHY IMPACT HEALTH?

A photograph of a white Apple keyboard with a black stethoscope coiled around its neck. The keyboard is visible in the top left corner of the slide.
